The Early Symptoms of CoVid-19 „Corona“

The following important Information was sent to me personally, by a professional nurse. She got it by a befriended nurse to provide help to our suffering world.

Disclaimer by the providing nurse:

We still lack of data for the final symptoms, because the beginning is so similar to influenza. This Post is in any case helpful, to at least identify the virus.

Hopefully, it will help.

K. C. – nurse with experience in multiple countries

Thanking You, that You want to share:
